

Compliance Overview Workshop

Preferred
Content Services

Workshop objectives

- Align and equip your Compliance and IT teams to tap into the wealth of capability within Compliance Center as part of the compliance journey.
- Demystify the technology for compliance professionals
- Demonstrate the importance of a compliance strategy to IT professionals
- Remove the burden on IT and Compliance professionals to 'self-learn' and 'self navigate' their way through Office 365 compliance features.

Interactive Workshop Format

- ½ day highly structured workshop
- Recorded for your future reference
- Hosted by a tech savvy, passionate, compliance specialist
- Tour and demonstrations within Compliance Center

Workshop outcomes:

After participating in this interactive workshop your team will:

- Understand the key IT and compliance challenges
- Have a clear understanding of the technological capabilities available and clarity on Microsoft licensing
- Learn how to create assessments and reports

Next Steps:

This is just the first step in your compliance journey with Microsoft. We can support you in:

- Agreeing features and settings, developing a rollout roadmap and deploying compliance technologies;
- Formulating a short, medium and long-term strategy to mature your compliance posture;
- Keeping up to date with developments.

Workshop Agenda

The workshop is structured around 6 categories of technology within the Compliance Center:

1. **Discovery** tools including Content Search and eDiscovery;
2. **Information Protection** including Sensitivity Labels classification and Trainable Classifiers;
3. **Information Governance** covers data retention and deletion;
4. **Data Loss Prevention** for the prevention of inadvertent sharing of sensitive information; and
5. **Insider Risk Management** to facilitate the detection of insider risk within an organisation by surfacing risky and anomalous behaviour
6. **Compliance Manager** used to manage the organisation's compliance journey in a central, secure location.

Effectively managing an organisation's compliance efforts requires all hands on deck. We recommend a broad attendee list for the workshop that includes those responsible for compliance and personal information, senior leadership who will sponsor compliance technology adoption and those responsible for the Microsoft cloud ecosystem.

All workshops from Cloud Essentials are designed to be a catalyst for accelerating your cloud journey. They seek to:

1. **Impart years of accumulated specialist knowledge**
2. **Instigate high quality conversation across disparate business functions**
3. **Promote well-informed decision making**
4. **Point you towards a logical and achievable onward journey**
